

OPTIMIZING YOUR HVAC SYSTEMS

SAVE MONEY & RESOURCES

Reduce costs and save energy by only running things when they are needed. Make maintenance decisions based on accurate real-time data. Reduce downtime in systems by knowing when a component needs repairing before it fails. Our 8-in-1 sensor allows an easy and cost effective way to create a sensor ecosystem for all aspects of you HVAC system.

HVAC MONITORING INDUSTRY

MiSensors ensures comfort in your facility while saving money and energy. Mount on the side of HVAC equipment or pumps to monitor abnormal operating conditions. Monitor air pressure within rooms, air ducts, and vents. Improve indoor air quality by being alerted of clogged filter detection. Maintain suitable temperatures throughout the building. Mount anywhere in the HVAC System and provide to workers so they can press the alert button to request for help.

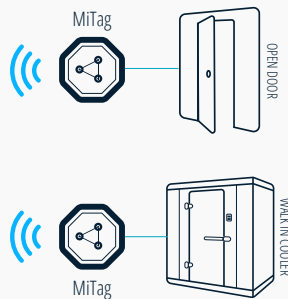

**SAVE UP TO 70% IN DEPLOYMENT COSTS
COMPARED TO COMPETITORS**

HOW IT WORKS

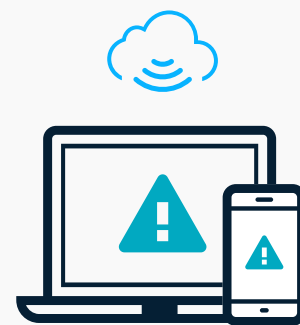

Connect.

MiSensors Gateway connects to ANY Router, Switch or Cellular Gateway using a RJ45 cable to an Ethernet Port.

Deploy.

Add any number of MiTag 8-in-1 Multi-sensor to your business environment.

Monitor

View & Manage MiTag sensors with your very own white labeled cloud-based web and mobile applications.
